

UMC 2018

Geotechnical Field Tour II

Field Tour II – Geology Field Tour

Friday, September 14. USD 120

Led by Rolf Birger Pedersen

Professor, K.G. Jebsen Centre for Deep Sea Research

Dept. of Earth Sciences, University of Bergen

09:00 Bus departs from Greighallen

19:00 Bus returns to Bergen

Field trip to the fjord area south of Bergen where Caledonian ophiolite and arc complexes are well exposed at numerous islands. A VMS deposit, mined from 1865 to 1969, and an ophiolite-hosted gold deposit that was mined in the late 19th century, will be visited. The field trip will be run by bus with a ferry crossing from the Bergen Peninsula to the islands of Stord. If weather permitting, we will use two rigid-inflatable boats to visit some of the localities.
